

SNAKE ZENXIA

GROUP 16

by

JSL SASI REKHA & EPSHITA SARKAR

Introduction

- Welcome to Snake Xenzia, a classic arcade game brought to life with Python and Pygame!
- In this timeless adventure, you'll navigate a slithering snake through a vibrant world filled with delicious fruits.
- But beware, for every bite you take brings both joy and challenge.

About Snake Zenxia

- As you venture through the game, your snake grows longer with every fruit it devours.
- But with growth comes risk - one wrong move, and your snake will collide with itself or the walls, spelling doom for your reptilian friend.
- Can you guide your snake to victory, avoiding the perils that lurk around every corner?

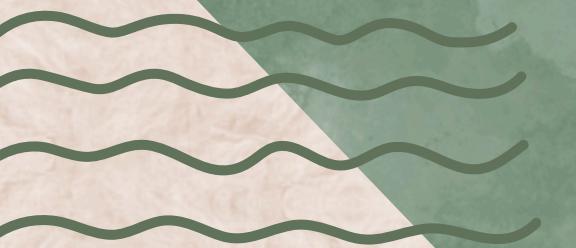

MISSION:

- Eat as many fruits as you can without crashing into yourself or the boundaries of the game.
- Each fruit consumed adds to your score and increases the length of your snake.
- Challenge yourself to see how long you can grow and how high you can score!

Goals

Instructions

1

Navigate through the colorful landscape,
seeking out fruits to devour.

2

Use the arrow keys to control the direction of
your snake: up, down, left, and right.

3

Watch out for collisions! Avoid running
into the walls or crossing paths with your
own tail.

Instructions

- 
- ④ With every fruit eaten, your snake grows longer, making maneuvering trickier.
 - ⑤ Keep an eye on your score displayed at the top-right corner of the screen.
 - ⑥ When the game ends, press Enter to play again or Escape to exit.

Novelty

Generating
different fruits
